MATHS

w/c 27th April 2020

Your Maths work for this week is again based on Decimals.

Please complete the following lessons:

- Adding decimals with the same number of decimal places
- Subtracting decimals with the same number of decimal places
- Adding decimals with a different number of decimal places
- Subtracting decimals with a different number of decimal places

Just like last week, you will find a Powerpoint for each lesson which you can work through and an accompanying worksheet. Answers are again provided should your parents wish to work through it with you - do make sure you only use these after completing the work!
Remember, you do not need to print the worksheets, you can just answer the questions in your exercise books. Maybe take a picture of the sheet to work from in case everyone is trying to use the same computer.

White Rose Maths is also providing videos which go alongside these lessons and which you may find helpful to watch. These are available on:
https://whiterosemaths.com/homelearning/year-5/
(Search for **Summer Term, Week 2** to find the lessons you have been set for this week) They are also promising a Friday challenge like last week.

In addition to this, if you want to recap and consolidate some of the Maths learning we have done already this year, do look at the new lessons being put on BBC Bitesize during this period which are on:
https://www.bbc.co.uk/bitesize/dailylessons
