

Year 2 Week commencing 30th March 2020

Although hard copies are not available in school it is possible for the children to write the answers on a piece of paper, exercise books or discuss the answers orally. Failing these options we have ensured that for each subject we have given you practical ideas that don't need the use of the computer. We have included a lot of ideas and worksheets this week so that there is work to do over this unusual Easter break. We do feel that in year two it's very important that children keep reading and being read to at home. We would ask that reading takes priority over other tasks although all subjects remain important to the overall development of your children. Obviously, it is entirely up to you how much you do with your children during this time. We truly miss the children and are safe in the knowledge that they are in the best place at this moment in time.

Please say hello to the children on our behalf.

Mr Gargiulo, Mrs Abbott and Mrs Rowntree
