

MATHS

w/c 18th May 2020

For this week our Maths work is once again aligned with what is being set on the Home learning pages by both White Rose Maths and BBC Bitesize. The links are below:

(<https://whiterosemaths.com/homelearning/year-5/>)

(<https://www.bbc.co.uk/bitesize/dailylessons>).

Lots of this will be recapping and consolidating your Year 5 knowledge of topics already completed in order to help you feel secure in these areas. As school has a premium subscription to White Rose Maths, we have access to the videos and worksheets, all of which are provided on our school website. If you are still finding a section hard, do use the linked resources on BBC Bitesize to give yourself more practice.

This week try to complete the following lessons (video links below):

- Add and subtract fractions <https://vimeo.com/418155222>
- Add fractions <https://vimeo.com/418155456>
- Add mixed numbers <https://vimeo.com/418155646>
- Subtract mixed numbers <https://vimeo.com/418155840>

Just like in previous weeks, you will find an accompanying worksheet and answers are again provided should your parents wish to work through it with you - do make sure you only use these after completing the work!

Remember, you do not need to print the worksheets, you can just answer the questions in your exercise books. Maybe take a picture of the sheet to work from in case everyone is trying to use the same computer.

If you want to, have a go at the White Rose Friday Challenge, which will also be available on:

<https://whiterosemaths.com/homelearning/year-5/>

Do remember that the most suitable questions for Year 5 are Challenges 1 to 5. They are great for challenging your thinking and improving your reasoning and problem solving skills.

Mrs Elliott and Miss Dunn
