

# Year 5 Science w/b 18/04/20

This week we are looking at the human life cycle. Have a look at the Power Point on the school website which explains about the different stages of the human life cycle.

Your task is to create a concertina book like the one in the photo below to show all the stages of the human life cycle from baby to old age. On each page draw a picture of the stage and a sentence describing what happens in that stage.

For example, you could do these stages:

foetus, baby, toddler, primary age child, adolescent, early adulthood, middle adulthood and late adulthood.

Have fun and post on Seesaw for us to see 😊
