

Topic

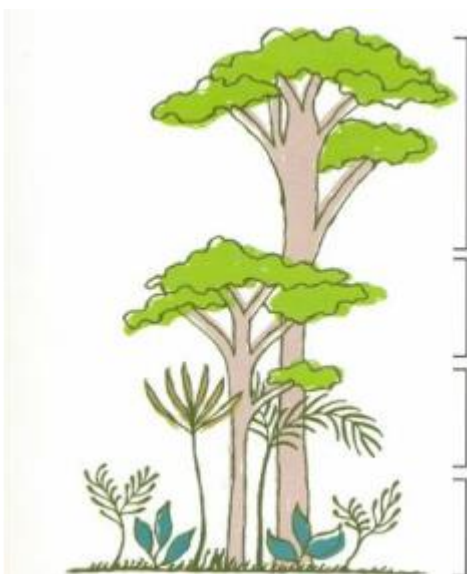

This week we will be starting to learn more about Rainforests! You will be creating a poster of your own with lots of information about the different layers of the rainforest.

Task 1:

Using an atlas, or internet research, complete the sheet on mapping out where the Amazon rainforest is.

Task 2:

Look through the PDF PowerPoint on the layers of the rainforest (perhaps you might also want to complete to internet research yourself too). Then see if you can draw a diagram of the different layers in a rainforest on a piece of paper. This will be the start of your poster. It might look something like this...

Task 3

Once you have done that, complete the sorting sheet, deciding which rainforest layer each statement is about. You might want to write some of them on your poster as facts when you have finished and checked your work.

Task 4

Who lives where in the rainforest? Complete the sorting sheet deciding which animal is best suited to which layer of the rainforest - you can choose whether to complete it as *, ** or ***. When you are finished, maybe you could add some of the animals to your rainforest poster!
